American Fiber & Finishing, Inc. (AF&F) manufactures Rymplecloth® #301 Purified Wiping Cloth, Purewipe® Cheesecloth, and Purewipe® 4x4 Gauze Sponges for the Aerospace and Industrial markets. AF&F's products above are manufactured to meet or exceed the stringent standards of the Boeing Material Specification BMS 15-5F, and to the Aerospace Material Specification AMS-3819C for Aerospace Wipers.

One of the requirements of the Aerospace industry is for the cloth used to wipe and prepare surfaces be low-lint. Since cotton fiber is used to make our wiping products lint cannot be eliminated entirely. There will be some lint (low-lint) but it is to be minimized, and it must meet the Aerospace Specifications. The specifications require that there be less than 10 mg/sq ft of lint as the standard. AF&F minimizes the lint in the chemical processing of the fabric. The cotton cloth is processed with a chemical that protects the cotton fibers from being damaged. We do test and certify that our Rymplecloth® and Purewipe® Cheesecloth meets or exceeds the industry standards.

Sincerely,

A handwritten signature in black ink that reads "Dot Whitt". The signature is written in a cursive, flowing style.
