Health and Safety:

Nuvite C-49 SuperCleaner does not contain toxic or extremely hazardous ingredients, and is not environmentally restricted. Users should follow good safety procedures, including wearing of gloves and goggles along with other standard safety procedures. Refer to C-49 Material Safety Data Sheet for further information.

Directions For Use:

Directions: Spot cleaning: Dilute Nuvite C-49 1:8 with water. Spray terry towel to dampen cloth, then apply to soiled spots. Soak out as much soil as possible into dry terry towel. If soil spot persists after soaking with towel, spray C-49 directly on spot and use soft brush to agitate up and down, then side to side. Reapply dry terry towel to soak out agitated residue. Repeat as needed. Finally, lightly spray around general area of spot, and work surface with up and down then side-to-side action with terry towel.

For broad areas: Dilute C-49 to 1:12. Clean soiled area with up/down, then side to side action with C-49 dampened terry towel. As surface becomes wet, switch to dry towel.

For leather: after cleaning very soiled areas with C-49, replace oils and surface condition with Nuvite Leather Guard. Always use good ventilation, with eye and skin protection, especially when working beneath surfaces being cleaned. Refer to MSDS for health & safety information. Contact Nuvite representatives for further information and assistance.

When using Nuvite materials, please refer to the appropriate procedures and recommendations for use and equipment, or consult with your Nuvite representatives.
