

Nuvite Professional Interior Products: *Leather Cleaning/Conditioning*

Nuvite Leather Guard Fine Leather Finisher & Conditioner

For light cleaning & replacing lost oils in leather after deep cleaning. Not shiny or slippery –restores a soft, supple, finished, new leather look and feel

Directions: Pour small amount of Leather Guard onto smooth cotton rag folded into quarters. Apply uniformly over leather surface, spreading & work-

ing cream into surface until dry. When finished, and surface has had time to cure, use a dry, clean cotton towel to polish to a soft luster. Leather Guard replaces critical lost oils due to drying & cleaning, and will help leather to resist cracking.

For deep cleaning or heavily soiled leather use Nuvite C-49 Supercleaner (1:12) and a soft brush prior to final conditioning with Leather Guard.
