SUBJECT : NTO FOR USE OF NUVITE NUPOWER II AND NUSHINE II

REQUEST
CPA request the use of NUPOWER II (A/C cleaner) and NUSHINE II (A/C polish) for use on their A/C.

ANSWER
Airbus Industrie are pleased to advise CPA that there is no technical objection to the use of NUVITE products "NUPOWER II" (qualified to AMS 1650) and NUSHINE II, providing the following points are understood.

AA/ As standard practice application of cleaning/polishing materials to transparencies should be avoided, as specific qualified materials already exist.

BB/ The application of polishes to painted surfaces may reduce the effectiveness of chemical paint removal.

CC/ The capabilities of these products are guaranteed by the NUVITE CHEMICAL CORPORATION. No guarantee to their success or effectiveness can be made by Airbus Industrie.

Best rgds.
