Nuvite

Exterior Wetwash Cleaning Products

Nuvite's wetwash exterior surface cleaning and maintenance products have been developed through years of experience with fleet and industrial users who require ease of use, economy and exceptional performance.

All Of Nuvite's Wetwash System products have outstanding versatility, cleaning power and are safe for both operators and structures.

Your Nuvite representative can help you to design a comprehensive program for fleet maintenance, or can advise you for a specific need for one vehicle. Contact Nuvite for full information on the line of wetwash products that offer superior performance, economy, versatility, ease of use and exceptional appearance results!

- For wetwash cleaning of commercial or private aircraft, trucks, buses, boats, automobiles, RV's, railway rolling stock, or cleaning of machinery and equipment.
- All wetwash system products conform to major airframe manufacturer's requirements for safety to airframe materials, including 2024 T3 and 7075 T6 aluminum, mild and cad plate steel, high-strength steel, acrylics, and paint.
- Nuvite wetwash system products can safely be used at full strength for degreasing or special situations without being dangerous to users and they are dilutable to meet normal cleaning requirements.

Nuvite Exterior Wetwash Products

- **SS 9-3**
Economical general-use alkaline-based degreaser and hand wipedown cleaner. Dilute to 1:12 for degreasing of nose and leading edges. Can be used as a hand wipe-down cleaner. Spray on area within arm's reach and wipe until bugs and dirt are removed. Use dry terry towel to dry and shine.
 - **CitriCut/CitriCut Gel**
Popular citrus-based wetwash/degreaser that can be used from full strength for degreasing heavy, caked-on grease and dirt, or up to 1:20 dilution as a mop on/water rinse wetwash. Gel version clings to vertical and overhead surfaces. Degreasing: Spray on, let soak -do not allow to dry, rinse off with water & pressure washer.
 - **Impact HD III**
A heavy-duty degreaser in gel form for vertical and overhead surface cling ability. Mop on full strength or 1:2 as a spray fluid. Let soak, agitate, do not allow to dry before rinsing with pressure washer spray.
