

AFF Cheesecloth Technical Datasheet

Product Description

Manufacturers Part Number:588020

American Fibre and Finishing Cheesecloth is an extremely soft and absorbent, 4-ply, 100% woven cotton cloth, used for a variety of specialised applications across many industries, including Aerospace, Composites and Automotive.

The openness of the weave assures the user that the wiping cloth will not displace the contaminants on the surface, but will clean the surface and leave it ready for bonding, painting or polishing.

Applications include: Critical cleaning and surface preparation (e.g. composite bonding, mold preparation & cleaning and sealing transparencies). Also, cleaning and polishing in a variety of applications, such as automotive cleaning, cleaning transparencies and aluminium skins, and furniture production.

Sold by the individual roll.

For larger quantity orders please use our quote function.

Commodity Code: 5208219000

Approvals

- AMS 3819, Class 1, Grade A
- DMS 1820E,
- MDM 15-1216
- P5396S,
- SS9170/680,
- Bell 1249E
- Boeing HMS15-1216

Features

- Compatible with all cleaning liquids and solvents
- No contamination from chemicals as found in non-woven wipers
- No contamination from foreign matter as found in rags
- Rolls are pre-cut into 9" x 24" squares (128 squares per roll) to reduce wastage
- Silicone free
- Extremely low-lint
- ECO-friendly (bio-degradable and free of ozone depleting agents)
