Kanguru Oil (5 Liters)
Technical Datasheet

Product Description

Kangaroo (Kanguru) Oil (5 Ltr) is a revolutionary lubrication oil for use in the sanding and grinding of metal surfaces. Its unique formula not only helps to control the depth and accuracy of the cut whilst helping you to achieve a uniform scratch pattern, but also extends the life of your abrasive pads by up to 300% and helps to avoid ‘clogging’. Its application is simple – spray onto the surface you’re abrading and then sand/grind as usual. Ensure that the surface on which you’re working is kept lubricated, i.e. keep it wet – if it begins to dry while you’re working, spray it again.

Aerospace applications includes preparing new (including clad) and heavily oxidised aluminium and stainless steel (including titanium-enriched stainless steel) surfaces for polishing (use with SiaAir discs – contact a Frasers Aerospace representative for more information on the SiaAir range of abrasives). Non-aerospace applications include preparing new aluminium (including clad) and stainless steel surfaces for polishing and removing oxidation from aluminium and stainless steel surfaces before polishing.

Sold in 5 Liter and 500ml bottles.

Commodity Code: 3402909000

SKU: FA-PO1133-5LTR

Features

- Helps control the depth of the ‘cut’
- Helps the user achieve a uniform scratch-pattern
- Extends the life of abrasive pads by up to 300%
- Helps to stop abrasive pads ‘clogging’
- Contains no hazardous substances (1999/45/EG)
- Suitable for use on industrial metals

Product Description.
Kangaroo Oil is a revolutionary lubrication oil for use in the sanding and grinding of metal surfaces. It’s unique formula not only helps to control the depth and accuracy of the cut whilst helping you to achieve a uniform scratch pattern, but also extends the life of your abrasive pads by up to 300% and helps to avoid ‘clogging’.
It’s application is simple – spray onto the surface you’re abrading and then sand/grind as usual. Ensure that the surface on which you’re working is kept lubricated, i.e. keep it wet – if it begins to dry while you’re working, spray it again.
Aerospace applications includes preparing new (including clad) and heavily oxidised aluminium and stainless steel (including titanium-enriched stainless steel) surfaces for polishing (use with SiaAir discs – contact a Frasers Aerospace representative for more information on the SiaAir range of abrasives). Non-aerospace applications including preparing new aluminium (including clad) and stainless steel surfaces for polishing and removing oxidation from aluminium and stainless steel surfaces prior to polishing.

Features:
• Helps control the depth of the ‘cut’
• Helps the user achieve a uniform scratch-pattern
• Extends the life of abrasive pads by up to 300%
• Helps to stop abrasive pads ‘clogging’ • Contains no hazardous substances (1999/45/EG)
• Suitable for use on industrial metals

Health & Safety Considerations.
Kangaroo Oil is not environmentally restricted. Users should use standard safety precautions, such as wearing gloves and eye protection along with any other standard safety procedures. Refer to Material Safety Data Sheet for further information.
