15? Waterless Wash Wax Mop
Technical Datasheet

Product Description

This new patent pending, first of its kind, double sided mop, has two independent, washable micro fiber pads. One pad, the “wet side”, is for applying Wash Wax ALL to the surface to be cleaned, and the other pad, the “dry side”, is for drying the surface. Aero Cosmetics customers are reporting that due to the waterless mop`s ease-of-use, it reduces the time to clean an aircraft or RV by 40-50%. Now you can clean a much larger area faster, with less effort, while also eliminating the safety concerns with constantly climbing and moving a ladder.

This Head fits most pole threads, but not all will fit correctly. We do not guarantee it will fit your pole. Look elsewhere on this site for poles that will fit. Poles sold separately.
Replacement microfiber pads available.
