TO OUR VALUED CLIENTS

October 26<sup>th</sup>, 2017

The following letter will serve to confirm the status of Nuvite Chemical Compounds' pre-registered products under the regulation guidelines of REACH #EC 1907/2006 (Registration, evaluation, and Authorization of Chemicals) for any ingredient in quantities greater than one ton per year as follows:

Nu-Shine-II System  
Nu-Power-II

All other products manufactured by Nuvite Chemical Compounds whose ingredients do not exceed one ton per year are exempt from reporting. Any new product whose volume will approach the one ton figure will be registered prior to the May 2018 deadline.

With respect to continuity of delivery, please be assured that because of our due diligence in pre-registration of the components in the above products, there will not be any disruption of supply of product to any entity whatsoever.

We remain committed to the continuation of all REACH ECHA compliancy requirements not only to the EU clients, but also to our Domestic and International clients outside the EU jurisdiction. As a primary manufacturer, this process includes a detailed investigation of EU registered ingredients, any risk assessments, notifications through Safety Data Sheets, Technical Bulletins, and through any other means of communication in order to apprise the client of all regulatory aspects of the products.

In addition, our authorized REACH Representative in the EU is brought into the process and coordinates as a consultant in order for our organization to apprise the client of substance details to include health and safety matters.

We look forward to providing continued quality appearance products and service to our industry and in the interim, if we may be of further technical assistance, please do not hesitate to contact our organization.

Respectfully,

A handwritten signature in black ink, appearing to read "Clifford Lester", written over a horizontal line.

Clifford Lester  
Executive Director & Formulation Chemistries  
Nuvite Chemical Compounds  
(Division of Universal Photonics, Inc.)
