

**SWIRL-FREE SHINE**

***The Deepest Shine.  
The Highest Gloss.  
No Swirl Marks.***

***Superior Shine - In Half The Time***

*Automotive Aviation Marine Metal Stone  
A Revolution in Professional Polishing*

[www.buffpro.com](http://www.buffpro.com)

Patent Pending

**No Swirl Marks or Holograms**

Axial motion of the pad eliminates circular micro-marring leaving a professional swirl-free shine every time.

**Reduces Labor**

Up to a 50% improvement in efficiency making every job fast and effective saving time and money.

**Ease of Use | Peace of Mind**

High speed adjustable operation giving you the heat and friction you want without the required training to master.

**Dual Pistol Grip Handles**

Ergonomically designed hand grips minimizes awkward wrist positioning and hand fatigue.

**Minimizes Mess and Splatter**

Cylindrical pad keeps compounds under the buffer reducing the use of chemicals and minimizing the need to mask.

**Pads Stay Cleaner Longer**

Centrifugal force keeps polish on the outside of the pad so it won't load up with compound like traditional orbiters.

**Multiple Pad Options**

Available pads include options for Cutting, Polishing and Finishing.

**Industrial Grade Motor**

An electrically operated motor, heat-treated precision-cut gears, and a variable speed locking trigger. Great for mobile situations or shops.

**Variable Speed**  
1200-2700 rpm

**EasyPro**  
Auto-Locking Trigger

**Quick Change Pads**  
Just Pull the Spindle

## Foam Style Pads

### Power Pad

The Heavy Cutting Power Pad for BuffPro® Model JF180 Axial Polisher, is an open cell polyester foam pad that works with your most aggressive compounds to provide unparalleled cutting power. The wide bite and open cells mean that compound stays where the work is being done and that you even out your roughest areas quickly and uniformly.

### Medium Cut Pad

The Medium Cutting Pad for BuffPro® Model JF180 Axial Polisher, is an open cell polyester foam pad that works with your most aggressive compounds to provide unparalleled polishing power and accuracy. The wide bite and open cells mean that compound stays where the work is being done and that you take down rough spots quickly and uniformly.

### Polishing Pad

The Polishing Pad for BuffPro® Model JF180 Axial Polisher, is an open cell polyester foam pad that works with your milder finishing compounds to provide unparalleled polishing and finishing results. The wide bite and fine cells mean that compound stays where the work is being done and that you polish and finish all of your work quickly and uniformly.

### Finishing Pad

The Finishing Pad for BuffPro® Model JF180 Axial Polisher, is an open cell polyester foam pad that works with your mildest finishing compounds to provide unparalleled final finishing results. The wide bite and fine cells mean that compound stays where the work is being done and that you finish all of your work quickly and uniformly.

### Heavy Cut Wool Pad

The Heavy Cutting Wool Pad for BuffPro® Model JF180 Axial Polisher, is a heavy wool material over a foam pad that works with your most aggressive compounds to provide unparalleled cutting power. The compound stays where the work is being done and that you even out your roughest areas quickly and uniformly.

### Polishing Wool Pad

The Polishing Wool Pad for BuffPro® Model JF180 Axial Polisher, is fine wool material over a foam pad that works with your milder polishing compounds to provide unparalleled polishing and finishing results. The compound stays where the work is being done so you can finish all of your work quickly and uniformly.

### SLW Finishing Pad

The SLW Finishing Pad for BuffPro® Model JF180 Axial Polisher, is a synthetic lambs wool material over a foam pad that works with your mildest finishing compounds to provide unparalleled final finishing results. The compound stays where the work is being done so you can finish all of your work quickly and uniformly.
