

Aerospace Quality Policy – ISO 9001:2015

Fraser's Aerospace supply aerospace cleaning chemicals and materials, predominantly manufactured in the USA and supplied mainly into aircraft detailers, fixed base operators (FBO's) and maintenance, repair and overhaul (MRO) service providers. We also offer global sourcing and supply services for aerospace consumables, materials and components for aircraft manufacturers and subcontractors. Products and services are offered globally with primary target markets being Europe, the Middle East and Africa. Headquartered at 1 St. James Road, Brentwood, Essex, CM14 4LH, UK.

It is our goal to provide the best service possible and to meet or exceed our customer's expectations. To this end, we have updated our QMS and successfully transitioned to the new ISO 9001:2015 standard.

Within the framework of this management system, we are committed to meeting the criteria of this standard, and also to complying with the requirements of our customers and the regulatory authorities that govern the aerospace industry.

We will establish quality objectives for our company and review them on a planned and regular basis to enable us to continually improve the effectiveness of the quality management system.

This policy will be made available throughout the company and will be regularly reviewed for continuing suitability.
