

## Nulmage

### **CLEANER & DEBUGGER FOR POLISHED METAL**

For cleaning stubborn bug residue, perfect for touch-ups in between polishing

### **GENERAL CLEANING**

1. Pour a small amount of **Nulmage** onto a flannel polishing cloth.
2. Apply to surface, wiping on gently to avoid scratching from surface soils & dust.
3. Gently spread material over target polish area.
4. Rub until **Nulmage** is removed.
5. Slight haze will remain, allow to dry.
6. After haze has dried completely, polish away to bright shine with clean cotton flannel polishing cloth.

### **STUBBORN BUG REMOVAL**

1. Wet bug spot with **Nulmage**.
2. Spread material on area around bug while **Nulmage** soaks bug material.
3. After a few seconds, rub away bug residue.
4. Keep any remaining bug residue wet & soaking.
5. Remove with gentle rubbing.
6. Repeat until bug spot is disappeared.
