22. SUBJECT: AIRCRAFT CLEANING PRODUCT APPROVAL					
23. DESCRIPTION / CONDITION / REQUEST We are a proposed supplier of aircraft cleaning chemicals to VistaJet. We have 7 products which will be used internally and externally which we would like to be approved. All products have Boeing, Airbus or AMS test certificates by SMI Miami. Could you please provide an indication what the costs will be. AeroWash Exterior Cleaner Boeing D6-17487 AIMS09-00-002 Nuvite NuPower Exterior Dry Wash Boeing D6-17487 AIMS 09-00-002 AMS 1650 Douglas CSD #1					
24. RESPONSE <small>(Bombardier use only)</small> First and foremost we would like to thank you for your interest in obtaining approval to utilize your cleaning products on the Challenger 300, 600 and 800 aircraft programs. Although the approval process would appear to be easy at first, it's actually a long and difficult approval cycle. It's not simply adding a product on a finish material. All aspects need to be taken into account for its certification such as flammability testing, product qualifications as well as testing in all environments, the following aspect needs to be taken into consideration, the Hold Over Time (HOT) which is a critical guidelines, etc. Even if you have listed other airframe manufactures' approvals, all aspects of certifying your cleaning products would need to be approved not only by Bombardier but also from all of our suppliers that your products would be in contact with. Therefore, the use of Frasers Aerospace cleaning products, is at the discretion of the aircraft operator. The information contained in this response field doesn't constitute "approved data" as defined per certification authorities but rather offer an official Bombardier recommendation or point of view. Thus, only referenced/attached engineering data might be considered as "approved" or "acceptable data" per applicable regulation. Disposition related to parts is only valid for parts that have not been involved in incidents/accidents.
