Sealant Guns & Accessories	72

INTRODUCTION

Crew Tool, formerly known as Plastek®, has been a leading manufacturer of sealant application and removal hand-tools since 2015. Due to being frequently mistaken for unrelated companies with similar names, which caused issues with misplaced orders and delayed correspondence, we decided to rebrand.

Our product offering now extends beyond plastics, and we specialize in providing cost-effective tools to the aerospace and aviation industry.

While we work with a variety of industries, we have a specific focus on the aerospace and aviation industry. We are an approved vendor in many of the largest aircraft manufacturers in the world because we have been able to provide our customers with significant and sustainable tools that are not only cost-effective, but also help increase productivity. We hope you give us the opportunity to extend our services to your business and become your go-to aerospace and aviation sealant application and removal hand-tool supplier.
